

TAPES / COMPOUNDS / SEALANTS / POLY FOAM

VIRGINIA KMP INSULATION TAPES, COMPOUNDS AND MASTIC

INSULATION TAPES

Virginia Foam Insulation Tape prevents pipe sweat and can also be used to reduce heat loss on pipes below 71°C.

<u>CODE</u>	<u>MODEL</u>	<u>LIST £</u>
011450	K-501 Foam Insulation Tape - 9m roll 50mm wide x 3mm thick	16.10

Presstite Insulation Tape may be used for either hot or cold temperature application within continuous duty service temperature range of -29°C to 93°C.

011451	PT-1 Presstite Cork Insulation Tape - 9m roll 50mm wide x 3mm thick	18.05
--------	---	-------

PERMAGUM SEALING COMPOUNDS

These sealing gums are a non-hardening, water resistant compound, formulated from the highest quality materials. They are non-staining, non-bleeding and have excellent adhesion.

<u>CODE</u>	<u>MODEL</u>	<u>LIST £</u>
011452	VG22 0.9kg (2lb) Sealing Compound Slug	13.37
011453	VG33 4.8mm x 30m Sealing Gum Cords	12.57
011454	PP36V 9.5mm x 7.5m Sealing Gum Cords	12.57

THERMAL MASTIC

A heat conducting compound that increases heat transfer to four times the rate obtained with mechanical mounting only. Can be used wherever rapid heat transmission is desired - between coils and liners, between liquid and suction line heat exchangers and between lines and thermal bulbs of controls and expansion valves.

<u>CODE</u>	<u>MODEL</u>	<u>LIST £</u>
011455	PM21 3.78 litre tin	60.07
011456	PM25 18.5 litre tub	255.75

SILICONE SEALANT

<u>CODE</u>	<u>DESCRIPTION</u>	<u>LIST £</u>
011457	White silicone sealant 310ml	3.58
011458	Clear silicone sealant 310ml	3.58
011459	Sealant application gun	4.35

One part ready to use silicone elastomer, specifically designed for use in coldrooms and refrigeration applications.

POLYURETHANE FOAM

<u>CODE</u>	<u>MODEL</u>	<u>LIST £</u>
011449	750ml can yielding 35 litres of cured polyurethane foam	10.65
